| Field | Detail |
|---|---|
| **Patient Name** | Mr. Elias Thorne |
| **Date of Birth** | 04/12/1965 (Age: 60) |
| **MRN** | 987654 |
| **Date of Admission** | 10/25/2025 |
| **Date of Discharge** | 11/02/2025 |
| **Primary Surgeon** | Dr. A. Sharma |

📝 **Primary Diagnosis & Procedure**

- **Primary Diagnosis:** Hepatocellular Carcinoma (HCC), Segment VI.
- **Procedure:** Partial Hepatectomy (Resection of HCC). Performed on 10/26/2025.
- **Co-morbidities:** Type 2 Diabetes Mellitus (T2DM), Seasonal Allergic Rhinitis (Pollen Allergy).

**Hospital Course Summary**

Patient underwent a successful partial hepatectomy. Initial post-operative period was stable. Pain was well-controlled with a PCA pump for the first 48 hours, then transitioned to oral analgesics. Surgical drain output decreased appropriately and was removed on post-op day 6. No signs of major bleeding or surgical site infection noted. Glucose management was challenging due to surgical stress; insulin regimen was adjusted daily to maintain target range ($<180 \text{ mg/dL}$). Patient tolerated a low-fat, diabetic diet by post-op day 5.

**Discharge Plan & Instructions**

1. **Wound Care:** Keep incision site clean and dry. Monitor for redness, swelling, or purulent drainage.
2. **Activity:** No heavy lifting ($>10 \text{ lbs}$) for 6 weeks. Gradual increase in walking activity.
3. **Medications:** Continue current medications. **Crucially, continue close blood glucose monitoring** ($\text{QID}$) and maintain the adjusted insulin/oral medication regimen.
4. **Follow-up:** Surgical follow-up in 7 days. Oncology consultation scheduled for 11/15/2025.
